

UNIVERSITÀ DEGLI STUDI DI NAPOLI FEDERICO II
Scuola Politecnica e delle Scienze di Base
Dipartimento di Biologia

Naples June 20, 2024

To Whom It May Concern,

I am writing to certify the research work conducted by Dr. Shruthivishali M. in my laboratory at the University of Naples Federico II. I am Professor Riccardo Talevi, head of the Laboratory of Reproductive Biology at our esteemed institution.

Dr. Shruthivishali M, who is affiliated with the Department of Clinical Embryology at Manipal University under the supervision of Professor Satish Adiga, joined our laboratory for a research period from April 19, 2024, to June 20, 2024.

During her tenure in our laboratory, Dr. Shruthivishali diligently and efficiently carried out experiments focused on understanding the effect of ovarian tissue size during hypothermic holding on vitrification outcomes using slush nitrogen. Additionally, she acquired knowledge and skills in utilizing our patented bioreactor for the in vitro development of ovarian follicles.

I had the opportunity to closely observe Dr. Shruthivishali's work and can attest to her high level of competence and her strong passion for research. Her dedication and meticulous approach have significantly contributed to the progress of our projects.

Please feel free to contact me if you require any further information regarding Dr. Shruthivishali's work and her time at our laboratory.

Sincerely,

Prof. Riccardo Talevi
Head of the Laboratory of Reproductive Biology
University of Naples Federico II
